Senior back-end engineer specializing in .NET, API design, and distributed architectures. 16 years building systems that scale and code that lasts. Comfortable owning features end-to-end: from client requirements through architecture to release. Track record of solving systemic problems and creating internal tools that teams actually adopt. Experienced with cloud-native development. Capable across the stack when needed, but backend is my home. I improve systems, not just maintain them.

## Work History

2024/06 - present

### Senior Back-End Engineer

*Tributech, Linz, Austria*

tributech.io

**.NET / C#, PostgreSQL, Redis, Docker, Kubernetes, Keycloak, Cerbos**

- Build and maintain APIs enabling external client integrations; own DevOps responsibilities including deployment pipelines and infrastructure
- Designed a permission-matrix testing system that replaced scattered authorization tests across endpoints - eliminated duplicated code, cut test execution time, and made permission updates trivial to maintain
- Led R&D initiative evaluating Cerbos for attribute-based access control; delivered working .NET proof-of-concept enabling authorization decisions based on request context, not just user roles

2022/04 - 2024/06

### Senior Back-End Engineer

*CyberVadis, Warsaw, Poland*

cybervadis.com

**.NET / F#, Azure (Function Apps, Service Bus, Key Vault, storage), Microsoft SQL Server, Docker**

- Delivered business features end-to-end using Domain-Driven Design; developed and maintained core backend services communicating via messaging infrastructure
- Built internal Azure Service Bus abstraction library that solved a persistent company-wide problem of messages silently lost between microservices - became the standard for async communication across teams

2020/12 - 2022/04

### Senior Back-End Engineer

*Ilabo, Warsaw, Poland*

ilabo.com

**.NET / C#, Azure, EventFlow, Microsoft SQL Server, CosmosDB, Redis, RabbitMQ, Docker, Kubernetes**

I hereby consent to my personal data being processed for the purpose of considering my application.

## Skills

- .NET
- C#
- F#

★★★★★ Core

- C++
- JavaScript
- TypeScript
- Node.js
- React

★★★☆☆ Working Knowledge

- Developed core microservices within a distributed system; contributed to key architectural decisions shaping the platform's design
- Owned end-to-end delivery of the platform's public API - gathered requirements directly with external clients, led technical design, and drove the team through implementation to release

2019/08 - 2020/12

## Senior Back-End Engineer

*Appfire, Gdansk, Poland*

appfire.com

**.NET / C#, Node.js, TypeScript, GCP**

- Developed TFS4JIRA, the company's flagship product syncing Azure DevOps with Jira
- Worked directly with clients to gather requirements and shape product direction

2018/02 - 2019/08

## Senior Full-Stack Engineer

*ABB – Library, Cracow, Poland*

library.abb.com

**.NET Core / C#, ASP.NET, React, Azure, Microsoft SQL Server, EF Core**

- Built corporation-wide technical documentation portal - full-stack delivery from backend services to React frontend
- Optimized for security and performance at enterprise scale

2016/09 - 2018/02

## Senior Back-End Engineer

*SDC, Warsaw, Poland*

sdc.dk

**.NET / C#, ASP.NET, WCF, Angular**

- Implemented PSD2-compliant APIs enabling secure third-party access to banking services
- Built authentication and authorization systems meeting EU regulatory requirements

2015/05 - 2016/09

## Senior Full-Stack Engineer

*KMD Poland, Warsaw, Poland*

kmd.net

**.NET / C#, ASP.NET, Angular, Microsoft SQL Server, EF Core**

- Architected and built core backend for a greenfield

- API design
- Microservices
- Distributed systems
- Domain-driven design
- Event sourcing
- CQRS

★★★★★ Architecture & Patterns

- Azure
- AWS
- GCP
- RabbitMQ
- Docker
- Kubernetes
- Terraform

★★★★☆ Cloud & Infrastructure

- Microsoft SQL Server
- PostgreSQL
- CosmosDB
- Redis

★★★★☆ Data

- Codex
- Claude Code
- Agentic workflows

★★★★☆ AI

## Languages

English - C1
Polish - C2

mobile payment platform serving the Danish market
- Integrated with existing financial infrastructure;

2014/11 - 2015/04

## Back-End Engineer

*Canon Ophthalmic Technologies, Wroclaw, Poland*

canon-ot.com.pl

**.NET / C#, WPF, WCF**

- Developed desktop application for ophthalmic examinations - strict medical device compliance, rigorous validation processes
- Delivered production-ready software meeting healthcare regulatory standards

2013/11 - 2014/11

## Back-End Engineer

*Scientific Games, Cracow, Poland*

scientificgames.com

**.NET / C#, ASP.NET, Microsoft SQL Server, NHibernate**

- Developed web services for government institutions - international project spanning three countries
- Coordinated across distributed teams and time zones; delivered APIs meeting governmental security requirements

2013/08 - 2013/11

## Back-End Engineer

*UBS, Cracow, Poland*

ubs.com

**.NET / C#, WPF, WinForms**

- Developed and maintained trading desktop application for one of the world's largest investment banks
- Delivered features and performance optimizations for reliability during market hours

2009/06 - 2013/08

## Back-End Engineer

*Novomatic Technologies Poland, Cracow, Poland*

novomatic-tech.com

**.NET / C#, C++, ASP.NET, WPF, Microsoft SQL Server**

- Progressed from Test Automation Engineer to Back-End Engineer across multiple gaming infrastructure projects
- Built core systems including cryptographically secure RNG module, real-time telemetry pipeline, and remote software deployment platform
- Developed ATM integration module with transaction security protocols connecting hardware to banking

I hereby consent to my personal data being processed for the purpose of considering my application.

infrastructure
- Created automated testing tools and load simulators that expanded QA coverage while reducing manual

## Education

2004/10 - 2010/06

### Automation and Robotics, MSc

*AGH University of Science and Technology, Cracow, Poland*

https://www.agh.edu.pl

Thesis: *OCR Neural Network Implementation on an Embedded Device* (C++, .NET, embedded)

## Certificates

2025/07

### AI_devs 3 Reloaded

*AI Devs*

credsverse.com/credentials/c55c2e6e-7043-4eea-b0fb-f005c6a4d2de

- Agentic workflows
- Large language models (LLM)
- Large language model operations (LLMOps)
- Vector databases
- Graph databases

2025/05

### Game Theory

*Stanford University*

coursera.org/account/accomplishments/verify/1Y9GRREZTEC0

- Mixed-Strategy Nash Equilibria
- Alternative Solution Concepts
- Extensive-Form Games
- Repeated Games
- Bayesian Games
- Coalitional Games

2024/04

### Professional Scrum Developer™ I (PSD I)

*Scrum.org*

credly.com/badges/a95f1e0b-b913-4124-96c5-99265c2bdea6

2010/01

### Certified Tester Foundation Level (CTFL)

*ISTQB*

## Projects

2025/06 - present

### *FriendlyEnvars*

github.com/llepecki/friendly-envars

I hereby consent to my personal data being processed for the purpose of considering my application.

Type-safe environment variable binding for .NET that maps environment variables directly to strongly typed configuration classes with automatic conversion and validation.

*Academic Teacher*

Guest lecturer at two Polish universities on software design, OOP, design patterns, and agile processes.

- Warsaw University of Information Technology · Oct 2016 - Jan 2017
- AGH University of Science and Technology · Oct 2011 - Jan 2012

I hereby consent to my personal data being processed for the purpose of considering my application.
