Senior back-end engineer specializing in .NET, API design, and distributed architectures. 16 years building systems that scale and code that lasts. Comfortable owning features end-to-end: from client requirements through architecture to release. Track record of solving systemic problems and creating internal tools that teams actually adopt. Experienced with cloud-native development. Capable across the stack when needed, but backend is my home. I improve systems, not just maintain them.

Work History

Jun 2024 - present

Senior Back-End Engineer

Tributech, Linz, Austria

tributech.io

.NET / C#, PostgreSQL, Redis, Docker, Kubernetes, Keycloak, Cerbos

- Build and maintain APIs enabling external client integrations; own DevOps responsibilities including deployment pipelines and infrastructure
- Designed a permission-matrix testing system that replaced scattered authorization tests across endpoints - eliminated duplicated code, cut test execution time, and made permission updates trivial to maintain
- Led R&D initiative evaluating Cerbos for attribute-based access control; delivered working .NET proof-of-concept enabling authorization decisions based on request context, not just user roles

Apr 2022 - Jun 2024

Senior Back-End Engineer

CyberVadis, Warsaw, Poland

cybervadis.com

.NET / F#, Azure (Function Apps, Service Bus, Key Vault, storage), Microsoft SQL Server, Docker

- Delivered business features end-to-end using Domain-Driven Design; developed and maintained core backend services communicating via messaging infrastructure
- Built internal Azure Service Bus abstraction library that solved a persistent company-wide problem of messages silently lost between microservices - became the standard for async communication across teams

Dec 2020 - Apr 2022

Senior Back-End Engineer

Ilabo, Warsaw, Poland

ilabo.com

.NET / C#, Azure, EventFlow, Microsoft SQL Server, CosmosDB, Redis, RabbitMQ, Docker, Kubernetes

I hereby consent to my personal data being processed for the purpose of considering my application.

Łukasz Łepecki

Senior Back-End Engineer

Skills

- .NET
- C#
- F#

★★★★★ Core

- C++
- JavaScript
- TypeScript
- Node.js
- React

★★★☆☆ Working Knowledge

- Developed core microservices for a MES (Manufacturing Execution System) platform; contributed to key architectural decisions shaping the system's design
- Owned end-to-end delivery of the platform's public API - gathered requirements directly with external clients, led technical design, and drove the team through implementation to release

Aug 2019 - Dec 2020

Senior Back-End Engineer

Appfire, Gdansk, Poland

appfire.com

.NET / C#, Node.js, TypeScript, GCP

- Developed TFS4JIRA, the company's flagship product syncing Azure DevOps with Jira
- Worked directly with clients to gather requirements and shape product direction

Feb 2018 - Aug 2019

Senior Full-Stack Engineer

ABB, Cracow, Poland

www.abb.com

.NET Core / C#, ASP.NET, React, Azure, Microsoft SQL Server, EF Core

- Built corporation-wide technical documentation portal - full-stack delivery from backend services to React frontend
- Optimized for security and performance at enterprise scale

May 2015 - Feb 2018

Senior Full-Stack Engineer

KMD, Warsaw, Poland

kmd.net

.NET / C#, ASP.NET, Angular, Microsoft SQL Server, EF Core

Architected and built core backend for a greenfield mobile payment platform serving the Danish market
Implemented PSD2-compliant APIs enabling secure third-party access to banking services
Built authentication and authorization systems meeting EU regulatory requirements

Nov 2014 - Apr 2015

Back-End Engineer

Canon Ophthalmic Technologies, Wroclaw, Poland

canon-ot.com.pl

.NET / C#, WPF, WCF

- API design
- Microservices
- Distributed systems
- Domain-driven design
- Event sourcing
- CQRS

★★★★★ Architecture & Patterns

- Azure
- AWS
- GCP
- RabbitMQ
- Docker
- Kubernetes
- Terraform

★★★★☆ Cloud & Infrastructure

- Microsoft SQL Server
- PostgreSQL
- CosmosDB
- Redis

★★★★☆ Data

- Codex
- Claude Code
- Agentic workflows

★★★★☆ AI

Languages

English - C1
Polish - C2

I hereby consent to my personal data being processed for the purpose of considering my application.

- Developed desktop application for ophthalmic examinations - strict medical device compliance, rigorous validation processes
- Delivered production-ready software meeting healthcare regulatory standards

Aug 2013 - Nov 2014

Back-End Engineer

Scientific Games, Cracow, Poland

scientificgames.com

.NET / C#, ASP.NET, Microsoft SQL Server, NHibernate

- Developed web services for government institutions - international project spanning three countries
- Coordinated across distributed teams and time zones; delivered APIs meeting governmental security requirements

Jun 2009 - Aug 2013

Back-End Engineer

Novomatic Technologies Poland, Cracow, Poland

novomatic-tech.com

.NET / C#, C++, ASP.NET, WPF, Microsoft SQL Server

- Progressed from Test Automation Engineer to Back-End Engineer across multiple gaming infrastructure projects
- Built core systems including cryptographically secure RNG module, real-time telemetry pipeline, and remote software deployment platform
- Developed ATM integration module with transaction security protocols connecting hardware to banking infrastructure
- Created automated testing tools and load simulators that expanded QA coverage while reducing manual effort

Education

Oct 2004 - Jun 2010

Automation and Robotics, MSc

AGH University of Science and Technology, Cracow, Poland

https://www.agh.edu.pl

Thesis: *OCR Neural Network Implementation on an Embedded Device* (C++, .NET, embedded)

I hereby consent to my personal data being processed for the purpose of considering my application.

Certificates

Jul 2025

AI_devs 3 Reloaded

AI Devs

credsverse.com/credentials/c55c2e6e-7043-4eea-b0fb-f005c6a4d2de

- Agentic workflows
- Large language models (LLM)
- Large language model operations (LLMOps)
- Vector databases
- Graph databases

ISTQB

Projects

Jun 2025 - present

FriendlyEnvars

github.com/llepecki/friendly-envars

Type-safe environment variable binding for .NET that maps environment variables directly to strongly typed configuration classes with automatic conversion and validation.

Academic Teacher

Guest lecturer at two Polish universities on software design, OOP, design patterns, and agile processes.

- Warsaw University of Information Technology · Oct 2016 - Jan 2017
- AGH University of Science and Technology · Oct 2011 - Jan 2012

I hereby consent to my personal data being processed for the purpose of considering my application.
