

Senior back-end engineer specializing in .NET, API design, and distributed architectures. 16 years building systems that scale and code that lasts. Comfortable owning features end-to-end: from client requirements through architecture to release. Track record of solving systemic problems and creating internal tools that teams actually adopt. Experienced with cloud-native development. Capable across the stack when needed, but backend is my home. I improve systems, not just maintain them.

Work History

- Mar 2026
- present

Staff Software Engineer

OEK, Cracow, Poland

oeconnection.com

.NET / C#, PostgreSQL, AWS

- Drive agentic development across a team of several squads; design and evolve the agent harness they all share
 - Built skills encoding team conventions and recurring workflows, plus subagent orchestration for multi-step tasks - made agent output consistent across squads and sped up delivery
 - Added hooks and guardrails enforcing quality checks while agents work - issues get caught before code reaches a PR, reducing back-and-forth in review
- Jun 2024
- Mar 2026

Senior Back-End Engineer

Tributech, Linz, Austria

tributech.io

.NET / C#, PostgreSQL, Redis, Docker, Kubernetes, Keycloak, Cerbos

- Build and maintain APIs enabling external client integrations; own DevOps responsibilities including deployment pipelines and infrastructure
 - Designed a permission-matrix testing system that replaced scattered authorization tests across endpoints - eliminated duplicated code, cut test execution time, and made permission updates trivial to maintain
 - Led R&D initiative evaluating Cerbos for attribute-based access control; delivered working .NET proof-of-concept enabling authorization decisions based on request context, not just user roles
- Apr 2022
- Jun 2024

Senior Back-End Engineer

CyberVadis, Warsaw, Poland

cybervadis.com

.NET / F#, Azure (Function Apps, Service Bus, Key Vault,

Lukasz Lepecki

Senior Back-End
Engineer

Working Knowledge

storage), Microsoft SQL Server, Docker

- Delivered business features end-to-end using Domain-Driven Design; developed and maintained core backend services communicating via messaging infrastructure
- Built internal Azure Service Bus abstraction library that solved a persistent company-wide problem of messages silently lost between microservices - became the standard for async communication across teams

Dec 2020 Senior Back-End Engineer

- Apr 2022 *Ilabo, Warsaw, Poland*

ilabo.com

.NET / C#, Azure, EventFlow, Microsoft SQL Server, CosmosDB, Redis, RabbitMQ, Docker, Kubernetes

- Developed core microservices for a MES (Manufacturing Execution System) platform; contributed to key architectural decisions shaping the system's design
- Owned end-to-end delivery of the platform's public API - gathered requirements directly with external clients, led technical design, and drove the team through implementation to release

Aug 2019 Senior Back-End Engineer

- Dec 2020 *Appfire, Gdansk, Poland*

appfire.com

.NET / C#, Node.js, TypeScript, GCP

- Developed TFS4JIRA, the company's flagship product syncing Azure DevOps with Jira
- Worked directly with clients to gather requirements and shape product direction

Feb 2018 Senior Full-Stack Engineer

- Aug 2019 *ABB, Cracow, Poland*

www.abb.com

.NET Core / C#, ASP.NET, React, Azure, Microsoft SQL Server, EF Core

- Built corporation-wide technical documentation portal - full-stack delivery from backend services to React frontend
- Optimized for security and performance at enterprise scale

- API design
- Microservices
- Distributed systems
- Domain-driven design
- Event sourcing

May 2015 Senior Full-Stack Engineer

KMD, Warsaw, Poland

- Feb 2018

kmd.net

.NET / C#, ASP.NET, Angular, Microsoft SQL Server, EF Core

Architected and built core backend for a greenfield mobile payment platform serving the Danish market

Implemented PSD2-compliant APIs enabling secure third-party access to banking services

Built authentication and authorization systems meeting EU regulatory requirements

Nov 2014 Back-End Engineer

- Apr 2015

Canon Ophthalmic Technologies, Wroclaw, Poland

canon-ot.com.pl

.NET / C#, WPF, WCF

- Developed desktop application for ophthalmic examinations - strict medical device compliance, rigorous validation processes
- Delivered production-ready software meeting healthcare regulatory standards

Aug 2013 Back-End Engineer

- Nov 2014

Scientific Games, Cracow, Poland

scientificgames.com

.NET / C#, ASP.NET, Microsoft SQL Server, NHibernate

- Developed web services for government institutions - international project spanning three countries
- Coordinated across distributed teams and time zones; delivered APIs meeting governmental security requirements

Jun 2009 Back-End Engineer

- Aug

2013

Novomatic Technologies Poland, Cracow, Poland

novomatic-tech.com

.NET / C#, C++, ASP.NET, WPF, Microsoft SQL Server

- Progressed from Test Automation Engineer to Back-End Engineer across multiple gaming infrastructure projects
- Built core systems including cryptographically secure RNG module, real-time telemetry pipeline, and remote software deployment platform
- Developed ATM integration module with transaction security protocols connecting hardware to banking

infrastructure

- Created automated testing tools and load simulators that expanded QA coverage while reducing manual

Education

Oct 2004 Automation and Robotics, MSc
- Jun 2010 *AGH University of Science and Technology, Cracow, Poland*

<https://www.agh.edu.pl>

Thesis: *OCR Neural Network Implementation on an Embedded Device* (C++, .NET, embedded)

Certificates

Jul 2025 AI_devs 3 Reloaded
AI Devs

credsverse.com/credentials/c55c2e6e-7043-4eea-b0fb-f005c6a4d2de

- Agentic workflows
- Large language models (LLM)
- Large language model operations (LLMOps)
- Vector databases
- Graph databases

May 2025 Game Theory
Stanford University

coursera.org/account/accomplishments/verify/1Y9GRREZTECO

- Mixed-strategy Nash equilibria
- Alternative solution concepts
- Extensive-form games
- Repeated games
- Bayesian games
- Coalitional games

Projects

Jun 2025 *FriendlyEnvars*
- present github.com/Ilepecki/friendly-envars

Type-safe environment variable binding for .NET that maps environment variables directly to strongly typed configuration classes with automatic conversion and validation.

Academic Teacher

Guest lecturer at two Polish universities on software design, OOP, design patterns, and agile processes.

- Warsaw University of Information Technology · Oct 2016 - Jan 2017
- AGH University of Science and Technology · Oct 2011 - Jan 2012
